Winnipeg, MB, Canada

## SUMMARY

---

- M. Eng. in Structural Engineering from the University of Manitoba with immediate availability and eligible for an Engineer-in-Training (EIT) license.
- Extensive knowledge of the structural design of buildings, bridge structural performance, 3D modeling, structural analysis and dynamics, computer programming, technical report writing, and interpreting engineering drawings.
- Practical knowledge of building design codes such as the National Building Code of Canada (NBC), Manitoba Building Code, CSA A23, CSA S6, and CPCI Design Manual 5.

## WORK EXPERIENCE

---

- **Structural Drafter and Designer, Splendid Homes Corporation** *May 2023- Nov. 2023*
  - Designed architectural and structural packages, demolition plans, and detailed 3D BIM models and renderings for over 10 residential projects using AutoCAD and Revit.
  - Verified truss layouts to conform to specifications.
  - Led Autodesk Revit training sessions for new hires.
- **Teaching Assistant of Bridge Engineering, CIVL 4032** *Jan. 2023- Apr. 2023*  
University of Manitoba, Instructor: Dr. Graziano Fiorillo
- **Civil Engineering Intern, Dreamland Corporation** *May 2022- Aug. 2022*
  - Designed the architectural plan for two residential buildings and a data center using AutoCAD and Revit.
  - Animated building walkthroughs utilizing the Navisworks animator module.
  - Detected and resolved clashes by overlaying architectural, electrical, and mechanical plans using Navisworks.
  - Generated construction cost estimates, performed material takeoffs, conducted on-site visits and field reviews, inspected construction tasks to ensure compliance with project plans, and prepared technical reports.

## TECHNICAL SKILLS

---

<b>Modeling and Analysis</b>	Revit, AutoCAD, Navisworks, MS Project, SAP2000, ETABS, SAFE, SPSS, BIM 360, Bluebeam, ArcGIS Pro, Office Suite (Excel, Word, and PowerPoint)
<b>Programming Languages</b>	Python, MATLAB, Dynamo, Fortran

## EDUCATION

---

<b>University of Manitoba</b>	<i>Sep. 2022- May. 2024</i>
<b>Master of Engineering in Structural Engineering, GPA: 3.88/4.5, Advisor: Dr. Graziano Fiorillo</b>	
Recipient of International Graduate Student Entrance Scholarship (IGSES)	
Selected Course Work: Finite Element Analysis, Structural Health Monitoring, Plastic Analysis of Structural Frames, Virtual Design and Construction, Prestressed Concrete, and Behaviour of Reinforced Concrete Members.	
<b>K. N. Toosi University of Technology</b>	<i>Sep. 2019- Jun. 2022</i>
<b>Master of Science in Construction Management, GPA: 3.88/4</b>	
Selected Course Work: Project Scheduling and Control; Building Information Modeling; Infrastructure Asset Management; Construction Contracts; Financial Management.	
<b>Shahid Beheshti University</b>	<i>Sep. 2014- Feb. 2019</i>
<b>Bachelor of Science in Civil Engineering, GPA: 3.01/4</b>	

## ACADEMIC PROJECTS

---

- **Design and Analysis of a Footbridge Using SAP2000** *Sep. 2022- Dec. 2022*  
*Finite Element Analysis coursework*
  - Developed a model of a footbridge in SAP2000 based on a detailed plan and elevation drawings.
  - Analyzed the bridge model to determine the first 20 natural frequencies and their corresponding periods, as well as forces, moments, and maximum vertical displacement under various load conditions.
  - Documented the modeling approach for each structural element (beam, column, frame, slab, bearing, and brace).
  - Justified the reliability and trustworthiness of the work through an analytical methodology.
- **Safety Zoning of Building Projects in Tehran Based on Public's Perception and Standard Safety Criteria Utilizing GIS** *Sep. 2020- Jun. 2022*  
*Master of Science Thesis Project*
  - [Demo: Thesis Dashboard](#)
  - Captured 1,887 photos of 490 under-construction buildings in 22 municipal districts in the city of Tehran.
  - Conducted a survey of the public's perception regarding the safety of under-construction buildings.
  - Created two safety maps using ArcGIS to sort the municipal districts and depict a color spectrum based on the public's perception of safety (PPS) and standard safety criteria.
  - Compiled a correlation study between the PPS with standard safety criteria using SPSS.
- **Asset Management for a Bridge Network** *Feb. 2020- Jun. 2020*  
*Infrastructure Asset Management coursework*
  - [Demo: Asset Management Dashboard](#)
  - Developed a comprehensive asset management plan for a bridge network consisting of 161 bridges.
  - Simulated the management plan utilizing a Discrete-Event Simulation (DES) library in Python.
  - Performed preventive maintenance, rehabilitation, and reconstruction investment analysis.
  - Conducted a study of the analysis methodology, including data analysis, development of maintenance alternatives and performance indicators, Life Cycle Cost Analysis (LCCA), and annual investment plan per asset.
- **Analysis and Design of a Sanitary Sewer Tunnel for the City of Edmonton** *Sep. 2019- Feb. 2020*  
*System Analysis and Design coursework*
  - Simulated the process of a Tunnel Boring Machine (TBM) excavating a sanitary sewer tunnel utilizing a DES.
  - Created a framework in which a crane loads and installs liners, liners perform lining with precast concrete, a crane unloads liners and spoil, and a train carries the spoil to an offsite location.
